INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

(Chapter II of the Patent Cooperation Treaty)

(PCT Article 36 and Rule 70)

Applicant's or agent's file reference P26984PC00	FOR FURTHER ACTION	ON s	See Form PCT/IPEA/416					
Inemational application No. PCT/IB2004/051060	International filing date (day)	month/year)	Priority date (day/month/year) 02.07.2003					
Inemational Patent Classification (IPC) or na F41A13/08	ational classification and IPC							
Applicant DENEL (PTY) LTD ET AL.								
This report is the international pre Authority under Article 35 and tra	This report is the international preliminary examination report, established by this International Preliminary Examining Authority under Article 35 and transmitted to the applicant according to Article 36.							
2. This REPORT consists of a total	of 6 sheets, including this	cover sheet.						
3. This report is also accompanied	by ANNEXES, comprising:							
a. sent to the applicant and	to the International Bureau) a total of sheets, a	s follows:					
sheets of the description, claims and/or drawings which have been amended and are the basis of this report and/or sheets containing rectifications authorized by this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions).								
sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filed, as indicated in item 4 of Box No. I and the Supplemental Box.								
b. (sent to the International Bureau only) a total of (indicate type and number of electronic carrier(s)), containing a sequence listing and/or tables related thereto, in computer readable form only, as indicated in the Supplemental Box Relating to Sequence Listing (see Section 802 of the Administrative Instructions).								
This report contains indications relating to the following items:								
☑ Box No. I Basis of the o	pinion							
☐ Box No. II Priority								
☑ Box No. III Non-establish	ment of opinion with regar	d to novelty, inventive	e step and industrial applicability					
☐ Box No. IV Lack of unity								
⊠ Box No. V Reasoned state	and a property of the state of							
☐ Box No. VI Certain docu		•						
	cts in the international appli							
Box No. VIII Certain obse	rvations on the internationa	al application

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

PCT/IB2004/051 060

Re Item III.

Claim 19 contains references to the description and the drawings. According to Rule 6.2(a) PCT, claims should not contain such references except where absolutely necessary, which is not the case here.

Re Item V.

1 The following documents are referred to in this communication:

D1: US 5 404 789 A (HAAS) 11 April 1995 (1995-04-11)

D2: US 3 377 918 A (AUSTIN ET AL.) 16 April 1968 (1968-04-16)

D3: US 2 807 986 A (HOWARD ET AL.) 1 October 1957 (1957-10-01)

2 Document D1, which is considered to represent the most relevant state of the art, discloses:

a fume extractor for extracting fumes from a bore of a barrel of a gun comprising a main reservoir surrounding said barrel, a first set of ports communicating with the barrel and a further set of ports communicating with the barrel, the arrangement being such that the main reservoir is pressurised when the gun is fired and further such that the fumes in the barrel are extracted by the release of pressure in the main reservoir via the further set of ports.

From this, the subject-matter of independent claim 1 differs in that: there are provided in addition:

- an inlet reservoir also surrounding the barrel and communicating with the barrel via said first set of ports and with the main reservoir via a second set of ports and
- an auxiliary reservoir also surrounding the barrel of the gun and communicating with the main reservoir via a third set of ports and with the bore of the barrel of the gun via the further (fourth) set of ports,

the arrangement being such that the main reservoir is pressurised via both the inlet and auxiliary reservoirs when the gun is fired and further such that the fumes in the barrel are extracted by the release of pressure in the main and auxiliary reservoirs via the further (fourth) set of ports.

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

PCT/IB2004/051 060

- 2.1 The subject-matter of claim 1 is therefore novel (Article 33(2) PCT)
- 3. The problem to be solved by the present invention may be regarded as: decrease the speed of discharge, increase the cooling capacity, reduce the wear on the valves and facilitate maintenance (see page 2, lines 5 21).
- 3.1 The solution to this problem proposed in claim 1 of the present application is considered as involving an inventive step (Article 33(3) PCT) for the following reasons:

None of the documents cited in the search report disclose fume extractors having an inlet reservoir and an auxiliary reservoir in addition to a main reservoir.

- 4. The dependent claims 2 16 provide additional features to the subject matter of independent claim 1.
- 5. Claims 17 and 18 describe a barrel and a gun including the fume extractor according to independent claim 1. Since the subject matter of independent claim 1 is novel and involves an inventive step, a barrel and a gun including this subject matter are also novel and involve an inventive step.
